Orakzai.org
Annual Impact Report 2025

Detailed Financial & Programme Impact Review

Reporting period: January 1 – December 31, 2025

Public-records edition · Prepared for transparency, learning and responsible stewardship

1 Publication note

This report is a **public-records edition** prepared from the public Orakzai.org website, the current repository implementation, and user-supplied organizational clarification available during preparation. It is designed to make the public record useful without turning current website claims into historical fact.

Important scope limitation No audited financial statements, bank confirmations, beneficiary registers, programme ledgers, signed evaluation reports, consented case studies or prior-period expenditure schedules were supplied for independent verification. Where these records were not publicly available, this report says so explicitly.

Verified from public page structure The website publicly lists a prior-period annual report, a prior-period fund-allocation breakdown and historical chart values. These are **source-reported**, not independently audited by this report.

Not independently verified The existence of an audit entry labelled "Verified", the identity of an auditor, programme totals, historical claims and financial percentages require the underlying documents before they can be described as audited evidence.

Reporting principle. This publication separates three categories: **publicly stated** means visible in a source; **source-reported** means repeated from the organization's own page or code; **verified** means supported by primary records. In this edition, most historical figures are source-reported rather than independently verified.

2 Executive overview

Orakzai.org presents itself as a digital embassy and community platform serving Orakzai families through education, healthcare, welfare, representation, economic opportunity and diaspora connection. The organization's public site frames its work around dignity, self-reliance and cross-border solidarity.

For the 2025 edition, the public record is strongest on **planned reporting architecture** and on identifying the evidence required for publication. It does not provide enough dated 2025 records to establish how many people were served, where resources were spent, or which outcomes were achieved during the reporting period.

Publicly listed on the source site

Annual report listing; prior-period fund-allocation page; prior-period audit entry; historical chart structure.

Still required for publication-grade assurance

Signed financial statements; ledger extracts; audit opinion; programme registers; beneficiary consent and outcome evidence.

Source: Orakzai.org public pages `/impact-reports`, `/financial-transparency` and `/impact`; accessed during preparation.

3 Chairman's message

A year for disciplined transparency

Orakzai.org's public mission is to connect community identity with practical support. In prior-period, that ambition was expressed through a growing portfolio of education, welfare, healthcare, legal and economic initiatives.

A credible institution must report not only its aspirations, but also its limits. This edition therefore places equal emphasis on what is known and what still needs documentation. Transparent reporting is not a claim of perfection; it is a commitment to make evidence easier to inspect.

Faisal Orakzai
Founder & Chairman
Orakzai.org

The image and title are reproduced from assets and public organizational content in the repository. This is an editorial presentation, not a signed statement from the named individual.

4 Organizational overview

The public website describes Orakzai.org as a community and diaspora platform with programmes spanning:

- Education and scholarships
- Healthcare access
- Social welfare and relief
- Legal rights and representation
- Economic innovation and grants
- Clean water and sanitation
- Youth and women's development
- Global diaspora networking

Public pillar	Public description	prior-period evidence status
Education	Scholarships, mentorship and skills pathways	Source-reported

Welfare	Relief, emergency support and family assistance	Data incomplete
Healthcare	Outreach, prevention and infrastructure	Data incomplete
Economic	Interest-free grants and entrepreneurship	Data incomplete
Representation	Legal and institutional advocacy	Data incomplete
Infrastructure	Water and sanitation initiatives	Data incomplete

5 Mission, vision and theory of change

Mission. To establish a sovereign digital sanctuary and global humanitarian platform that protects vulnerable individuals, funds higher education, delivers pro-bono legal aid, and provides interest-free economic grants across borders.

Vision 2030. To build a fully interconnected, self-sustaining global diaspora ecosystem where every family has access to justice, healthcare, quality education and clean infrastructure.

Theory of change

Inputs	Activities	Intended outcomes
Community trust, donations, volunteers, partnerships and institutional coordination	Education, relief, legal support, healthcare, grants, water and diaspora connection	Greater dignity, access, self-reliance, resilience and cross-border solidarity

Evidence boundary The theory of change is a synthesis of the public mission and programme descriptions. It is not a prior-period outcome evaluation.

6 2025 at a glance

The public sources reviewed do not provide a complete, dated 2025 results dataset. To avoid relabelling prior-period claims as 2025 achievements, this report records the 2025 evidence status directly.

2025 reporting item	Status	What is required
Members and community reach	Unavailable	Dated membership export and definition
Students and scholarships	Unavailable	Award register and completion records
Health and welfare cases	Unavailable	De-identified service register and outcomes
Grants and economic support	Unavailable	Approval and disbursement ledger
Programme expenditure	Unavailable	Signed financial statements and allocation notes
Annual report publication	This edition	Management review and source-document approval

Data integrity note The current website still contains prior-period and undated metrics. They are intentionally not copied into the 2025 results table.

7 Source register and evidence grading

Source	What it contributes	Grade
`/impact`	Historical chart values for earliest-year–prior-period and current impact card structure	B — source-reported
`/financial-transparency`	prior-period allocation percentages and audit entry	B — source-reported
`/impact-reports`	Report listing and current headline metrics	B — source-reported
`/mission-vision`	Mission, vision and roadmap language	C — narrative
Repository source	Implementation-level public record and labels	B — source-reported
Primary records	Signed accounts, ledgers, registers and consent forms	A — not supplied

Evidence grade A would require primary records or independent assurance. **Grade B** means an organizational public statement is visible but the underlying record was not independently inspected. **Grade C** means narrative or intended direction rather than a measured result.

8 2025 programme portfolio

The public programme architecture indicates a broad portfolio. This chapter records the areas named in the public site without claiming that every listed programme had a documented prior-period delivery result.

Humanitarian assistance
Relief, emergency response, welfare and crisis support

Legal protection
Rights, representation and migrant support

Education
Scholarships, mentorship and skills development

Healthcare
Outreach, prevention and infrastructure

Economic empowerment
Interest-free grants and entrepreneurship

Infrastructure
Clean water, sanitation and community facilities

Community development
Women, youth and sports initiatives

Diaspora engagement
Global connection and membership pathways

Programme categories are derived from current public navigation and page descriptions. prior-period activity-level confirmation requires programme records.

9 Programme review: humanitarian assistance

The public portfolio describes relief and welfare support for vulnerable families, including emergency response, food assistance, shelter-related support and longer-term poverty alleviation. A current page also

refers to a flood-response example and family assistance; however, the available public content does not provide a complete prior-period activity ledger.

Required field	Publicly available	prior-period status
Activities	Relief, emergency response and welfare descriptions	Partially described
Dates and locations	Some programme/location references	Incomplete
Beneficiaries	Headline counts appear on current pages	Not reconciled to prior-period
Expenditure	No prior-period programme ledger	Data not publicly available
Outcomes	Narrative intended outcomes	No prior-period evaluation supplied

Illustrative image from the organization's public asset library; not presented as photographic evidence of a documented prior-period event.

10 Programme review: legal protection and migrant support

The public site positions legal protection and representation as a core service. It refers to pro-bono legal support, rights advocacy and assistance for displaced or vulnerable people. The report cannot establish a complete number of cases handled in prior-period from the public record reviewed.

Publicly stated activity

Pro-bono legal protection, rights representation, institutional advocacy and migrant welfare support.

Evidence still needed

Case intake register, jurisdiction, case outcome, referral partner, safeguarding record, cost per case and consent protocol.

Responsible reporting Do not publish names, legal status, immigration details or identifiable case narratives without documented consent and a safeguarding review.

prior-period assessment

The programme is publicly described but its annual performance cannot be quantified responsibly from the available records. **Data not publicly available** for cases opened, cases resolved, locations served and prior-period expenditure.

11 Programme review: education and scholarships

Education is repeatedly presented as a strategic pillar. Public content references scholarships, mentorship, international pathways and skills development. The current repository contains multiple student figures across pages, while the user has clarified that the approved organizational figure is **2,500+ students**. That clarification is not yet reflected consistently in the repository source.

Figure or claim	Value	Treatment in this report
User-confirmed approved student figure	2,500+	Approved clarification; date scope still required
Impact chart prior-period students	700+	Historical source-reported value; requires reconciliation
Current repository counter	360+	Repository value flagged as outdated by user
Scholarships granted	500+ on mission page	Separate metric; primary evidence not supplied

The 2,500+ figure is included as user-confirmed organizational information, not independently audited evidence. It should not be relabelled as scholarships unless scholarship records support that label.

12 Programme review: healthcare initiatives

Healthcare is described through outreach, prevention, mobile care, clean water and improved access. The public impact chart lists 130+ health cases for prior-period, while other pages show different current figures. The historical number therefore remains source-reported and requires a case register or annual programme report.

prior-period source-reported metric

130+ health cases in the public historical chart.

Public programme direction

Mobile clinics, preventive care, health access and infrastructure.

Evidence required
De-identified case register, service type, location, referral pathway and outcome.

Financial evidence required
Provider invoices, transport costs, supplies, staffing and restricted-fund allocation.

13 Programme review: economic empowerment

The public site describes interest-free grants, entrepreneurship support, digital innovation and local economic development. A current initiative metric states 340+ grants disbursed, but its reporting period is not established by the public page. The Mission & Vision page states PKR 50M+ grants disbursed, also without a historical scope or supporting schedule.

Public claim	Value	prior-period reporting treatment
Current initiative metric	340+ grants	Period and ledger unavailable
Mission & Vision metric	PKR 50M+	Period and currency schedule unavailable
Programme design	Riba-free grants and incubation	Narrative; not an outcome measure

Financial discipline A grant count is not equivalent to an expenditure total. To report a prior-period grant programme, disclose approvals, disbursements, recoveries or write-offs, geography, recipient category, average grant size and total cash paid.

14 Programme review: water and infrastructure

Clean water and sustainable infrastructure are identified as long-term priorities. Public assets and programme pages describe water points, sanitation and infrastructure access, but a complete prior-period project register is not available in the sources reviewed.

Review question	Public record	Status
What was built?	Water and sanitation programme descriptions	No prior-period asset register
Where?	References to Orakzai and diaspora communities	No complete location schedule

Who benefited?	No verified prior-period beneficiary list	Data not publicly available
What did it cost?	No project-level financial schedule	Data not publicly available
What changed?	Intended access and health benefits	No evaluation supplied

15 Programme review: community and diaspora engagement

Diaspora connection is a central part of the public organizational narrative. The website describes a network spanning Pakistan, the Gulf, Europe, North America and other locations. A current page mentions 14+ countries and eight active chapters; the Mission page uses 12+ countries. These figures are not treated as prior-period outcomes without a dated membership or chapter register.

Reconciliation requirement

Before publication, management should approve one reporting definition: countries with registered members, countries with active chapters, countries with programme delivery, or countries reached through digital engagement. The number should be labelled accordingly.

16 Geographical impact

The public record references Orakzai District, Khyber Pakhtunkhwa, Pakistan and a wider diaspora. It does not provide a complete prior-period country-by-country programme expenditure or beneficiary schedule.

Geography	Public reference	Required evidence
Orakzai District	Community and infrastructure focus	Project and beneficiary register
Khyber Pakhtunkhwa	District and regional programme references	District-level expenditure
Pakistan	National leadership and community context	Country allocation and legal status

Diaspora locations	Gulf, Europe, North America and beyond	Chapter/member register by year

Map policy A geographic map should be added only after management approves the definition of "served" and provides a dated prior-period country or district schedule.

17 Metrics reconciliation

The public site currently contains several non-aligned metrics. This is a reporting risk because readers may interpret all numbers as referring to the same period.

Metric	Observed values	Required action
Students	700+ historical chart; 360+ repository counter; 2,500+ user-confirmed	Define period and metric; update source of truth
Families	3,100+ initiative metric; 10,000+ mission metric	Provide dated beneficiary register
Countries	12+ mission; 14+ initiative	Define countries reached and period
Grants	340+ initiative; PKR 50M+ mission	Separate count from cash total and provide ledger
Members	2,000+ historical chart; 2,850+ current page; 28,850+ current source	Reconcile system definition and dates

The user-confirmed 2,500+ student figure is recorded here as an approved clarification, but its reporting period and denominator are still required. It should not be presented as a prior-period result without a dated source.

18 Financial report: 2025 public disclosure status

No 2025 income statement, funding schedule, programme expenditure ledger, balance sheet or signed audit opinion was publicly available in the records reviewed. Accordingly, this report does not publish invented totals or convert a prior-period allocation into a 2025 figure.

Financial statement	2025 status	Required source
Income and donations	Unavailable	Bank and donor schedules
Programme expenditure	Unavailable	General ledger by programme
Administration and operations	Unavailable	Expense ledger and allocation policy

Financial position	Unavailable	Assets, liabilities and fund balances
Audit assurance	Unavailable	Signed independent audit report

Publication rule A percentage split may be shown only with its reporting year, monetary base and allocation method. Without those three items, the responsible 2025 entry is "Data not publicly available."

19 Financial statements and audit evidence

Statement requested	Publicly available?	Completion requirement
Income and funding sources	No	Signed income schedule and donor restrictions
Programme expenditure	No	General ledger and programme coding
Administrative expenditure	No	Expense ledger and allocation basis
Operational expenditure	No	Vendor and payroll schedules
Financial position	No	Statement of assets, liabilities and funds
Audit opinion	Entry only	Signed independent auditor report

Audit wording The website contains a prior-period audit entry labelled "Verified" and names "Chartered Accountants of Pakistan". Until the signed audit opinion and financial statements are supplied, this report describes that as a public website claim—not as independently verified assurance.

20 Governance and transparency

The public site presents leadership, programme pillars and transparency commitments. It also states controls including dual-signatory approval above PKR 50,000, quarterly financial summaries and an annual independent audit. Those commitments are important, but implementation evidence was not supplied for this report.

Publicly stated control

Dual-signatory approval for expenditures above PKR 50,000.

Evidence required

Approval matrix, sample payment vouchers and bank signatory policy.

Publicly stated commitment

Annual independent third-party financial audit.

Evidence required

Signed audit report, management letter and response to findings.

21 Challenges and lessons

The principal challenge identified by this review is not the breadth of the programme vision; it is the absence of a single dated evidence system that reconciles public numbers.

Challenge	Risk	Lesson for 2025
Multiple metric values	Readers cannot identify the reporting period	Publish a metric dictionary and cutoff date
No public financial totals	Allocation percentages lack monetary context	Publish audited statements and notes
Programme breadth	Activities cannot be tied to outcomes	Use programme registers and outcome indicators
Case-study gap	Human stories may be anecdotal or unconsented	Adopt consent and safeguarding workflow
Download buttons without files	Report availability is unclear	Attach stable PDF URLs and archive versions

22 Looking ahead: 2025 priorities

The following priorities are recommended for the 2025 reporting cycle based on the gaps identified in the prior-period public record. They are recommendations, not claims of completed activity.

1. Evidence system
Assign every metric a definition, period, owner and source document.

2. Financial publication
Publish income, expenditure, restricted funds and closing balances with notes.

3. Programme registers
Maintain dated activity, location, beneficiary and outcome records.

4. Safeguarding
Standardize consent, anonymization and referral protocols.

5. Digital access
Make each annual report downloadable from a stable public URL.

6. Independent assurance
Publish the signed audit opinion and management response.

23 Final transparency statement

This report does not convert a website claim into an audit finding. It records what the public record says, identifies contradictions, and lists the evidence needed to complete a donor-grade annual report.

What can be responsibly stated Orakzai.org publicly presents a multi-sector mission, lists a prior-period annual report, publishes a prior-period percentage allocation and displays historical impact values.

What cannot yet be responsibly stated The exact prior-period income, expenditure, country allocation, beneficiary count, audited financial position, programme outcomes and consented beneficiary stories are not publicly available in the records reviewed.

Accountability begins with a traceable record.

Prepared as a transparent public-records edition for further management review.

24 Completion checklist: documents needed

To convert this edition into a fully evidenced institutional annual report, the following documents should be supplied and archived:

No.	Document	Priority
1	Signed FY prior-period financial statements and audit opinion	Critical
2	Income and donation schedule by source and restriction	Critical
3	Programme expenditure ledger and allocation basis	Critical
4	prior-period beneficiary and activity registers by programme	Critical
5	Country/district and chapter schedule with definitions	High
6	Education and scholarship award register	High
7	Healthcare de-identified service register	High
8	Grant approval and disbursement schedule	High
9	Consent forms and case-study permissions	High
10	Board minutes, policies and management letter	Medium

25 References and methodology

Public sources consulted

2. Orakzai.org, “Financial Transparency”, `https://sonoforakzai.vercel.app/financial-transparency`.
3. Orakzai.org, “Our Impact”, `https://sonoforakzai.vercel.app/impact`.
4. Orakzai.org, “Mission & Vision”, `https://sonoforakzai.vercel.app/mission-vision`.
5. Public repository, `https://github.com/faisalorakzai-lab/SonOfOrakzai`.

Methodology. Public pages were read as displayed during preparation. Repository source was inspected to distinguish page text, hard-coded counters, historical chart values and report listings. Figures were not mathematically combined across pages when their period or definition was unclear. No financial statement, audit opinion, private register or external archive was treated as available unless directly supplied or publicly readable.

Access note: live Vercel deployment was available during preparation. The custom `orakzai.org` domain was not DNS-resolvable from the verification environment at the time of the earlier site check.
